Correction: *in situ*-prepared composite materials of PEDOT: PSS buffer layer-metal nanoparticles and their application to organic solar cells

Sungho Woo^{1*}, Jae Hoon Jeong^{1,2}, Hong Kun Lyu¹, Yoon Soo Han³ and Youngkyoo Kim^{2*}

Correction statement

In the Methods section of our published article [1], we mentioned that “we developed a novel *in situ* means of preparing stabilized Au or Ag NPs...”. However, we have recently noticed that the similar process has been reported by Moreno et al. [2]. Hence, we correct the statement in our manuscript by crediting the work by Moreno et al. [2]:

[Before Correction]

“We developed a novel *in situ* means of preparing stabilized Au or Ag NPs by the reduction of chloroauric acid (HAuCl₄) or silver nitrate (AgNO₃) with a sodium borohydride (NaBH₄) solution in the presence of aqueous PEDOT:PSS media”.

[After Correction]

“We used a simple *in situ* procedure of preparing stabilized Au or Ag NPs by the reduction of chloroauric acid (HAuCl₄) or silver nitrate (AgNO₃) with a sodium borohydride (NaBH₄) solution in the presence of aqueous PEDOT:PSS media [2-4]”.
